Risk	Notifying country	Regulation/ Standard	Notifica- tion count	Products	Partial Pictures
Chemical The toy's battery compartment opens easily without tools, making the batteries inside accessible. A small child could put them in the mouth; the battery may release electrolyte that can be ingested and damage the child's digestive system.	France	EN 62115	3	Sensory toy Soft toy	
Choking Silicone pull strings on the products are too long and can reach the back of a child's throat causing choking or asphyxiation. Small parts may detach from the products and cause a child to choke if they place them in their mouth.	Australia	Consumer Goods (Toys for Children up to and including 36 Months of Age) Safety Standard 2023	2	Pull string teether	
Choking The water beads inside the dumplings expand larger than permitted, posing a deadly ingestion hazard. If a child puts the product in the mouth or swallows it, contact with saliva or stomach liquids will cause the product to expand, which can result in occlusion of the respiratory tract or intestinal blockage.	USA	16 CFR 1250.4	2	Squishy bun toy
